

STACK CRUSHER UNIT

COMPLETE STACK DEMOLITION SERVICE

CRUSHER UNIT BEING LIFTED WITH CRANE TO STACK TOP

CONTINUOUS CUTTING ACTION MAKES SHORT WORK OF TALL STACKS

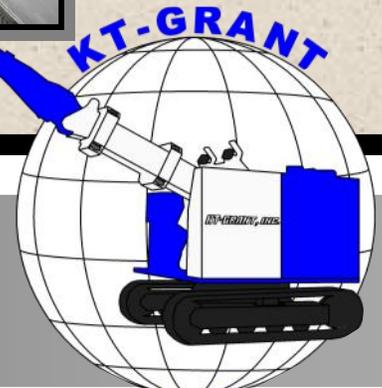

POWERFUL SHEAR ACTION JAW NIBBLES AWAY AT STACK FROM THE TOP TO THE BOTTOM

KT-Grant, Inc.'s Stack Crusher Unit is designed to take down tall stacks without the use of explosives or heavy machinery. The Stack Crusher Unit uses a powerful shear enclosed in a tubular frame that allows the crusher unit to ease onto the lip of the stack and take out sections of the concrete bite by bite. This minimizes the hazard of explosive ordinances, and takes down the stack safe and quickly. Operators are safely located away from the stack while operating the crusher unit, remote radio control is used with a remote power unit to run the crusher unit.

The Stack Crusher Unit can cut through reinforced concrete and brick stacks of various heights and diameters.

DEBRIS FALLS TO THE SIDE OF THE STACK, MINIMIZING FALLING HAZARDS TO NEARBY VESSELS
